

DCM Shriram Consolidated Ltd (DSCL) has received Environment Clearance from MoEF for 'Kapriion-Ki-Dhani Lignite Mining Project'

New Delhi, 4th July 2011: DCM Shriram Consolidated Ltd (DSCL) has received Environment Clearance from MoEF for Kapriion-Ki-Dhani Lignite Mining Project in Nagaur district of Rajasthan on 28th June 2011.

The company has already acquired more than 60 % of the land requirement through private negotiations with the land owners.

The mining lease application is now being pursued with the state government, and we would expedite the project on a fast track after obtaining the mining lease.

All necessary studies like the Topographic surveys, confirmatory drilling, Slope stability test, Hydro geological studies have been completed through reputed national and international agencies.

The Mining plan was prepared for the project by the leading national consultant CMPDIL. The approval of the mining plan submitted by us in December 2007, happened only in June 2010, by the Ministry of Coal. This led to a delay in obtaining the environment clearance, mining lease approval etc.

The project delay is thus due to reasons beyond the control of the company and we are now developing the project on a fast track.
